

Lesson 10

In this lesson we use chapters 22-24 to think about where we are going, however, we will be in set up mode for our final project. In lesson 11 we will begin to transition lessons 22-24 into our site. This process will take a few weeks. In addition, we will weave further chapters in over the next few lessons.

Many of you have sent your final project idea. In this lesson, please watch the videos for setting up

Add on Domain or subdomain

Redirect of Add on domain if applicable

Dreamweaver template or Project 7 CSS Dreamweaver Extension

Photoshop or Gimp image manipulation with your image or fotolia or other

For a review of the box model of CSS, please see Dreamweaver 23's videos

If you haven't been able to get through the chapters 22-24 tutorials, you might give that another try. It seems to go on forever but it's good to hang in there to see the potential of Dreamweaver.

Thanks, Kelly
